FIRST AID TREATMENT RECORD

Invoice No. FA-1024-0007
Date of service 2026-10-24
Event Cal Hacks 13.0

PATIENT

Name	Maya Chen	**Date of birth**	2001-03-14	**Sex**	F
Address	2217 Quillfeather Ave, Apt 3, Port Alder, CA 94998			**Phone**	(510) 555-0167
Allergies	No known drug allergies	**Medications**	None	**Wristband ID**	BND-7F3A-0219
Emergency contact	Lin Chen (mother), (510) 555-0181				

ENCOUNTER

Date of service	2026-10-24	**Time seen**	22:20	**Time released**	22:50
Incident time	approx. 22:05	**Location**	Main stage	**Arrival**	Walk-in
Chief complaint	Right wrist pain after a fall.				

HISTORY OF PRESENT ILLNESS

Patient presented to the Event Medical Station on foot at 22:20, accompanied by a friend. At approximately 22:05, while attending Cal Hacks 13.0, she slipped on a spilled drink near Main stage and fell onto her outstretched right hand. She did not strike her head and had no loss of consciousness. She reports immediate pain over the back of the right wrist, rated 5/10, worse with wrist extension and gripping. Denies numbness, tingling, or any other injury. Right-hand dominant. No prior injury to the right wrist.

VITAL SIGNS / PHYSICAL EXAM

Vitals (22:24) BP 122/78 Pulse 88 Resp 16 SpO2 99% RA Temp 98.4 °F Pain 5/10 GCS 15

General Alert and oriented x4, mild distress due to pain.

Head / neck No signs of head trauma. No midline cervical tenderness.

Right wrist Mild swelling over the dorsal wrist. Tenderness over the dorsal radiocarpal joint. No deformity. No anatomic snuffbox tenderness. No distal radius or ulna point tenderness. Full active range of motion, painful at end of extension. Grip 4/5, limited by pain.

Neurovascular Radial pulse 2+, capillary refill < 2 s, sensation intact in median, ulnar and radial distributions.

Skin / other Skin intact, no abrasions or lacerations. No injury found to other extremities.

ASSESSMENT

#	ICD-10-CM	DESCRIPTION
1	**S63.501A**	Sprain of right wrist, initial encounter
2	**W01.0XXA**	Fall on same level from slipping, tripping and stumbling without subsequent striking against object, initial encounter

PLAN / TREATMENT PROVIDED

1. Cold pack applied to right wrist for 15 minutes (22:27–22:42).
2. Light elastic compression bandage applied. Distal neurovascular status rechecked after application: intact.
3. Prefabricated wrist-hand orthosis fitted to right wrist.
4. Home care: rest, ice 15–20 minutes every 2–3 hours for 48 hours, elevation; over-the-counter acetaminophen or ibuprofen per label.
5. Follow up with primary care or urgent care in 24–48 hours if pain persists, for possible X-ray. Seek emergency care for numbness, color change in the fingers, or severe pain.

Disposition: Released ambulatory at 22:50 in stable condition, with a friend. Transport not indicated. Patient verbalized understanding.
